Before tuning up, and especially when stretching a new string, see that the bridge is straight. The E string side will usually be pulled over, caused by the frequent pulling up of that string; in a very short time your bridge is bent--if not broken. The writer has a bridge on his violin which has done good service for eight years and it as good and better than new. Some piano accompaniments to your violin solos are treated with simple harmony while others are in the contrapuntal style. Why is it? Some composers use both styles in the same piece. Why? Analyze a dozen or more of the concert pieces you play and see what reason and method underlies all composition in this particular. You can do this without being a learned harmonist, a poet or genius. Many students of the violin are very eager to learn, but are so situated (financially or geographically) that they are unable to learn what methods to pursue. They have no knowledge of the various studies written by masters of the instruments; do not even know who these masters are; would not know what to do with a book of studies if it were given to them; can find out nothing from such books as to the ways of shifting to the higher positions; do not know that the divisions of the bow must be carefully studied and used in various ways for different length of...
