## CALCULATIONS IN CHEMISTRY

DOWNLOAD

I.K. International Publishing House Pvt.Ltd., 2014. Softcover. Book Condition: New. 18x24 cm. Calculations in Chemistry is intended to help students overcome the challenges associated with solving the numerical problems in chemistry. Chemistry is a numerical science which cannot be fully appreciated without adequate numerical skills. In fact, the lack of problem-solving skills has been recognised as one of the major reasons for the poor performance recorded in the subject over the years. Budgetary and size constraints often translate to lack of space for solving enough sample problems in core textbooks and most problems are presented in a difficult manner that douses enthusiasm for learning. Thus, a book of this nature, containing numerous solved problems drawn from all aspects of chemistry, is necessary to complement the core texts if students are to attain the required level of mastery in the subject. Meant specifically for students studying chemistry at undergraduate and postgraduate levels, this book presents the calculations in chemistry in a simple, logical and down-to-earth manner that will impart students with the required numerical skills for excelling in chemistry. ? wide topical coverage ? clear, concise introductions that explain basic principles and theoretical basis for each type of calculation ? numerous representative examples ? practice problems and answers to test what has been explained ? end-of-chapter summary that gives a checklist of key terms and concepts ? numerous exercises, including objective questions, with answers ? exhaustive coverage of the mole concept ? use of SI units and IUPAC conventions ? it assumes little or no prior knowledge of chemistry and mathematics ? comprehensive treatment of quantitative analysis ? appendices that supply useful information. Contents: 1. Masses and Formulae 2. Chemical reaction and Stoichiometry 3. Redox Reactions and IUPAC Nomenclature 4. Atomic Structure and Chemical Bonding 5. The Gaseous State 6. The...
