

Functional Equations - Results and Advances

Filesize: 3.56 MB

Reviews

This type of ebook is every little thing and made me looking ahead of time and more. It is among the most amazing book i actually have read through. Its been designed in an exceptionally simple way in fact it is simply soon after i finished reading through this pdf in which actually transformed me, change the way i believe.

FUNCTIONAL EQUATIONS - RESULTS AND ADVANCES

DOWNLOAD

Book Condition: New. Publisher/Verlag: Springer, Berlin | The theory of functional equations has been developed in a rapid and productive way in the second half of the Twentieth Century. First of all, this is due to the fact that the mathematical applications raised the investigations of newer and newer types of functional equations. At the same time, the self development of this theory was also very fruitful. This can be followed in many monographs that treat and discuss the various methods and approaches. These developments were also essentially influenced by a number of journals, for instance, by the *Publicationes Mathematicae Debrecen* (founded in 1953) and by the *Aequationes Mathematicae* (founded in 1968), because these journals published papers from the field of functional equations readily and frequently. The latter journal also publishes the yearly report of the International Symposia on Functional Equations and a comprehensive bibliography of the most recent papers. At the same time, there are periodically and traditionally organized conferences in Poland and in Hungary devoted to functional equations and inequalities. In 2000, the 38th International Symposium on Functional Equations was organized by the Institute of Mathematics and Informatics of the University of Debrecen in Noszvaj, Hungary. The report about this meeting can be found in *Aequationes Math.* 61 (2001), 281-320. | Preface. Part I: Classical Functional Equations and Inequalities. On some trigonometric functional inequalities; R. Badora, R. Ger. On the continuity of additive-like functions and Jensen convex functions which are Borel on a sphere; K. Baron. Note on a functional-differential inequality; B. Choczewski. A characterization of stationary sets for the class of Jensen convex functions; R. Ger, K. Nikodem. On the characterization of Weierstrass's sigma function; A. J  rai, W. Sander. On a Mikusinski-Jensen functional equation; K. Lajk  , Z. P  les. Part II: Stability of Functional Equations....
