Date :2011-04-01 version 2. Lin-Na Zhang compiled the sensor detection technology and applications (2nd edition in the 21st century higher education planning materials) is divided into sensor-based detection technology and the theory and application of a typical sensor technology two. eleven chapters. Analysis of the sensor detection technology and the relationship between mechanical and electrical integration. describes the basis of non-power electrical measurement technology and sensor technology base; typical for a variety of sensors. in the brief introduction of its principles. based on performance with emphasis on detailed application examples describes the specific application of commonly used sensor technology. measurement and control circuits and debugging. and application of computer-aided detection and do a more detailed discussion. Sensor detection technology and applications (2nd edition in the 21st century higher education planning materials). content-rich. user-friendly. close integration of theory and practice. for detection of technical personnel engaged in sensing. electrical and mechanical professional college students. Graduate and sensor detection technology enthusiasts to read reference. or as a relevant professional materials. Contents: first sensor detection technology based Chapter 1 Introduction Section II sensor detection technology outlined the basic structure of mechatronic systems and key technologies Section sensor detection technology and the relationship between mechanical and electrical integration of non-Chapter II electricity consumption of non-detection technique based Section II non-detection technology and features of the basic composition of charge detection system and function of the third quarter non-power testing and characterization system of classification and classification of V IV measurements and analysis of measurement error Chapter III processing technology based sensor applications Sensors Section II outlines the work of the sensor mechanism and application of the...
